

Technical Training to unskilled workers to work under different climatic condition

After the experience of frequent severe cyclonic storm like 'FANI', an idea was evolved to create **Semi-Skilled Electrical Workforce (SEW)** who are at present working totally unrecognized. Most of the licensed workforce (Permit Holders) in the State are employed in the various industries, power utilities and other private sectors. The availability of no. of workmen for taking up the restoration works during emergency is not encouraging as compared to the volume of electrification works. Simultaneously the Electricity Regulation mandates all workmen engaged in the Electrical work shall be the permit holder. It is therefore thought to create a pool of Semi Skilled Electrical Workforce those who don't possess any educational qualifications as well as required vocational training for engagement to complement the large scale electrification and restoration works. They will be provided short term training in the relevant field of Electricity preferably in "Electrical Distribution" by the Skill Development Institute / Vocational Training Institute. After successful completion of the training, the Semi-Skilled Electrical Workforce (SEW) will be recognized with appropriate authorization. They will also be given career progression on obtaining requisite minimum experience. Please share the details information in the format prescribed below as per maximum data available.

Name of Agency & License No.	Name & Address (Mob. No./Block /Panchayat/ District) of workman having no permit/ no minimum educational qualification i.e class 7 th pass	Name of Division/ Sub-division/ Section, where worked during "FANI"	Name & Designation of Discom Supervising Officer	Nature of Work (*)	Work location/ feeder Name	Areas of Work	Period of work	Aadhar No. (if any)
1	2	3	4	5	6	7	8	9

N.B.:- 1. (*)

- Climbing Pole
 - Stringing of line
 - Fitting of cross arm
 - Installation of substation/ repair of transformer etc.
2. Please try fill up maximum no. of data available.
